Sterilizers

Balancing patient care with instrument processing challenges

Instrument processing is a highly regulated, time-consuming and labor-intensive task. This may make it challenging for staff to choose between prioritizing patient experience or properly sterilizing instruments. That's why we designed **Midmark® Steam Sterilizers** to help make instrument processing and adherence to clinical best practices as easy and as automated as possible.

Midmark® Steam Sterilizers

WHEN YOU INVEST IN MIDMARK STERILIZERS, YOU CAN BE CONFIDENT YOU ARE GETTING THE BEST—OUR STERILIZERS ARE THE MARKET LEADERS YEAR AFTER YEAR.

Midmark Steam Sterilizers are designed with intuitive instructions that can simplify compliance, cycle operation, and performing and recording device care. This can help to **reduce transcription and documentation errors which could account for 56% of sterilization errors.**¹ Automated mechanical monitoring and chemical indicator reporting can save time, helping simplify staff training and giving them confidence to process instruments.

INTUITIVE USER INTERFACE:

Navigate cycle setup and other processes in your preferred language—English, French or Spanish—with a clear, fingerprint-resistant 5-inch touchscreen you can utilize while wearing gloves. Choose a style—light or dark mode.

- 01 **MIDMARK M11 STEAM STERILIZER**
The 11" x 18" chamber makes this one of the largest of any standard countertop sterilizers on the market.
- 02 **MIDMARK M9 STEAM STERILIZER**
Pack all the reliable sterilizing power you need into a compact unit perfect for areas with limited space.

Midmark Sterilizers are designed to help make instrument processing as easy and as automated as possible.

WRAPPED
270°F, 4 MIN

WRAPPED
275°F, 3 MIN

DELICATE
250°F, 30 MIN

UNWRAPPED
270°F, 3 MIN

5 CUSTOM CYCLES*
250°F–275°F,
3 MIN–45 MIN

Simplify clinical workflow with dynamic-air-removal steam sterilizers that provide unique preset cycles to meet both the CDC and AAMI sterilization cycle recommendations for wrapped instruments.²

Determine cycle status—cycle in progress, cycle complete and cycle error—from a distance with a progressing color-coded LED light bar, large cycle-countdown clock and audible cues.

CYCLE IN PROGRESS

CYCLE COMPLETE

CYCLE ERROR

* These cycles are not FDA cleared and validation of sterility of items processed using a custom cycle is the responsibility of the user.

STREAMLINED COMPLIANCE RECORDKEEPING:
 Stay audit-ready with device reminders and notifications, user authentication, unlimited storage of routine care events for the life of the sterilizer, and automated cycle recordkeeping.
